PROFESSIONAL SYNOPSIS

- An astute & result oriented professional with **3 + years of experience in Software Quality Assurance** which includes Manual, **Web Service Automation** Testing using **Selenium Web-Driver** with **core Java &** extensive experience in **Agile Scrum practices.**
- Hands on Experience in **Designing the Framework** for the automation using Selenium WebDriver and **TestNG**.
- Extensive working experience in:
    - ✓ Agile /Scrum development environment.
    - ✓ Writing selenium test scripts using Selenium Web driver with JAVA.
    - ✓ Locating elements using Xpath and CSS selectors.
    - ✓ Implementing customized selenium BDD framework with cucumber design pattern.
    - ✓ Build Automation tools like Maven, TestNG.
    - ✓ Generating Automation report using HTML Reports.
    - ✓ Good experience in bug tracking tool JIRA.
- Clear understanding of Automation Testing Life cycle, SDLC, STLC and Test Methodologies.
- Hands on Experience in creating, modifying and enhancing both manual test cases and Test Scripts created in Selenium
- Hands on experience in Developing, maintaining and executing automated test scripts using Selenium.
- Extensive experience in writing and debugging automation scripts using **Selenium WebDriver**.
- Hands-on experience of **TestNG**, **BDD** Frameworks, **Maven**, **GIT**, **Cucumber**, Gherkin and SQL.
- Strong abilities in Software testing in creation of Test Scripts/Cases, execution of functional test cases and Defect management including defect creation, tracking, and reporting.
- Expertise in developing BDD tests using **Cucumber** by writing features and step definitions.
- Developed required Selenium support code in JAVA for Cucumber. Generation of automation script for Sanity and Regression test cases using Cucumber, Maven and Java.
- Proficient knowledge in various types of software Testing.
- Hands on experience in API Testing using POSTMAN Tool.
- Ability to quickly grasp the functionality of application under test and adapting to changes easily.
- Expertise in debugging issues occurred in front end part of web-based application which is developed using HTML5, CSS3, Node.JS and Java. Good working experience in reviewing and analyzing Business Requirements and creating Test Plans, Test Cases, Test Scripts, Test Estimation & Requirement Traceability Matrix.
- Involved in deliverables (**Test Conditions, Test Scenarios, Test Progress Report, Daily Status Report, and Test Completion Report)**.
- Enhancement of existing framework to improve the quality of code and avoiding redundancy in the code.
- Experience in integration of **Jenkins** and **GIT** in the existing framework.
- Hands on experience on implement **GROOVY scripts using JAVA classes**.
- Worked in a highly dynamic **AGILE** environment and participated in scrum and sprint meetings.
- Good Knowledge on HealthCare and e-commerce domain.
- Good exposure to **Agile**, **SDLC, STLC.**
- Ability to communicate effectively with development team members, Business and the vendor team regarding application issues and concerns.
- Comprehensive understanding of software testing including creation of **Test plan**, **Scenarios**, writing and reviewing test cases with internal and external team and **test execution** and sending **test metrics** and **artifacts** and **defect reports** to stakeholders.
- Good communication, Presentation skills and ability to quickly adapt to the technical environment and Commitment to work, **Quick Learner** and willing to take Instructions and Responsibilities.
- Experience in providing inputs on the work effort estimation and coordinate with onsite and offshore teams BA's , Dev and Prod Support and other support groups for smooth implementation of testing and to ensure knowledge base and supporting documents are created from test results for further reference and the defects are logged properly and test results are uploaded in SDLC Trackers.
- Experience in providing technical guidance and mentor ship to the team and able to work independently and with teams to deliver test plans and test cases successfully and establishes good working relationships with team members and peers working on related software.

TECHNICAL SKILLS

Primary Skills	Selenium WebDriver, WebDriverManager, TestNG, API Testing, CUCUMBER, BDD, Extent Reports, Postman.
Other Skills	Excellent technical knowledge, Quick learner, Great Analytical Thinking, Good Oral and Communication Skills, Effective in team work.
Operating System	Windows family, Unix,
Domain	Health Care,E-Commerce
Defect Tracking Tools	JIRA
Automation Framework	TestNG, Cucumber.
Automation Tool	Selenium Webdriver, Maven, Selenium, Postman.
Scripting Language	JAVA,C,CPP,HTML,CSS,SQL
IDE	Inteli J Idea, Eclipse.
Database	Oracle 11g,12c---SQL

PROJECTS EXECUTED

CoreFront Technologies Pvt Ltd: Bengaluru **As SDET-1**	**17-jan-2022 to till now**

Project #2

Project – InConnect-Patient Web Application
Client – Inovaccer
Role and Team Size - QA, Automation Engineer 10
Duration - Feb 2023 – till now
OS and tools - Windows 10
Technical Environment - Selenium Webdriver, TestNG, Maven, SQL
Testing Approach: Manual & Automation
Project management tool - JIRA
Software Development Process - Agile/Scrum

Synopsis:

Patient Application is web-based application and Mobile based Application designed for interacting with providers virtually.
Modules involved are:
1. Virtual Visits 2.Instant Virtual Visits 3.Provider Chat 4.Medication 5.Doc ASAP 6.Care Content 7.Health vitals.
By Using inconnect patient App Patient can communicate with providers, can connect to Google fit and Apple Health,Can set Remainders for Medication, can chat with providers.

Responsibilities:

- Interacting and Coordinating with PM and Client Team.
- Attended daily stand-up meetings, sprint planning and review meeting.
- Responsible for Creating Test Cases documents and executing the test cases.
- Reporting and tracking the Bug using Jira.
- Responsible for Requirement Analysis and Functional specification.

- Involved in reviewing Manual Test cases.
- Prepared Manual test cases and executed as per requirement and user stories.
- Involved in writing and reviewing Automation Test Scripts and Execution for regression and End to End scenarios.
- Closed issues and user stories for each release by manual and automation verification.
- Followed Agile testing methodology, participated in daily Scrum meetings and tested each Sprint deliverables.
- Debugging and maintenance of automation test scripts in batch mode and also implemented a plan on automation scripts based on Sprint.
- Run Defect Trailing and Review the Test Scenarios/ Test Cases with Business Understand customer requirements.
- Develop a test framework using TESTNG and Selenium Webdriver.
- Create Automation Test Scripts.
- Execution of test scripts using TESTNG.
- Analysis of nightly execution and preparing bug Report.
- Involved in Regression, Integration and Sanity testing .
- Worked with cross-functional teams to ensure quality throughout the software development lifecycle.
- Responsible for providing release review documents and production deployment QA signoff.
- Involved in Functional and Regression Testing.
- Performed functional and compatibility testing on different browsers like Chrome, Firefox, and IE.
- Involved in Sprint demo meeting.
- Involved in UAT and postproduction testing.
- Responsible for sending daily and weekly status report.

Project #1

Project – Safeway Grocery e-commerce
Client – Innovaccer
Role and Team Size - QA, Automation Engineer 10
Duration – jan-2022 – jan-2023
OS and tools - Windows 10
Technical Environment - Selenium WebDriver, TestNG, Maven, SQL
Testing Approach: Manual & Automation.
Project management tool – JIRA
Software Development Process - Agile/Scrum

Synopsis:

SAFEWAY E-Commerce website is online portals and Mobile Application that facilitate online transactions of goods and services through means of the transfer of information and funds over the Internet. In the early days, e-commerce was done partially through emails and phone calls. Here users can Navigate to Aisles and Products., clicking on cart, removing and adding products, place order after placing you can edit orders.

Responsibilities:

- Developed test automation framework scripts using Java Selenium Web Driver.
- Implemented cucumber framework with Java and Selenium.
- Performed compatibility testing of applications for dynamic and static content of browsers using HTML
- ids and XPath and CSS Selectors.
- Developed and maintained reports of all automation issues and test results.
- Integrated automation tests in continuous integration tools Jenkins for nightly consignment run of the scripts.
- Updating the Test Automation suite regularly to ensure its accuracy and usefulness.
- Collaborate with offshore and Manual QA teams to setup test data based on functional specifications For validation of features.

ACADEMIC CREDENTIALS

- **Bsc (Computer Science)** at
  Sri Venkateswara University, Tirupati, Andhra Pradesh.

EDUCATION DETAILS

- Bsc Computer Science from Sri Venkateswara University, Tirupati, Andhra Pradesh.
- 10+2 from APSWRS Jr.College, Madanapalle.
- 10th from APSWRS School, Valmikipuram.

PERSONAL INFO

Date of Birth: 15th May 2001
Gender: Female
Address: 163, Brindavan Layout, 5th cross TC Palya, KR Puram, Bangalore-560036, Karnataka.
